

[Draft] Supply Chain Issues Review

From VATieh@ITS.JNJ.com

Draft saved Wed 6/24/2026 1:57 PM

To Sarah Nakamura <Sarah Nakamura>; Maria Sanchez <Maria Sanchez>; David Okoro <David Okoro>; Patel, Ravi [DPYUS] <RPatel7@ITS.JNJ.com>; Eleanor Wright <Eleanor Wright >

Cc Production / Manufacturing Lead <Production / Manufacturing Lead>; Quality Assurance (QA) Lead <Quality Assurance (QA) Lead>; Regulatory Affairs Representative <Regulatory Affairs Representative>; Procurement / Supplier Management Lead <Procurement / Supplier Management Lead>; MSAT / Process Engineering <MSAT / Process Engineering>

Meeting Objective:

Align cross-functional stakeholders to address critical supply chain disruptions impacting production continuity and FDA compliance, and define immediate containment and recovery actions.

Agenda:

1. Situation Overview (5 min)

- Summary of critical supply chain issues impacting FDA compliance and production
[\[e-mail --...Compliance | Word\]](#)

2. Critical Issues Review (15 min)

- **BIND567:** Quality inconsistencies, stability issues, batch failures [\[e-mail --...Compliance | Word\]](#)
- **COMP042:** Traceability gaps, incorrect lot documentation, compliance risks
[\[e-mail --...Compliance | Word\]](#)
- **COMP043:** Supplier GMP non-compliance, erratic deliveries, stockouts [\[e-mail --...Compliance | Word\]](#)

3. Production Impact Assessment (10 min)

- Impact on batch release and production scheduling
- Inventory constraints and stockout risks
- Throughput and operational efficiency impact

4. Immediate Actions & Decisions (10 min)

- Material containment and batch prioritization
- Traceability recovery plan
- Supplier escalation and CAPA actions
- Evaluation of alternate suppliers

5. Next Steps & Ownership (5 min)

- Assign action owners
- Define timelines and escalation cadence
- Establish ongoing governance (daily control tower)
